PRODUCT OVERVIEW

Colby Selective Pallet Racking

- Australian made; unsurpassed quality
- Cost effective, high capacity storage
- Maximum storage flexibility and versatility
- Ideal where flexibility, access and speed of operation are the main objectives
- 100% pallet selectivity at all times
- Can be designed to handle virtually any pallet size or weight
- Systems are designed to suit individual needs and are configurable to suit storage requirements, warehouse parameters and materials handling equipment

Selective Pallet Racking

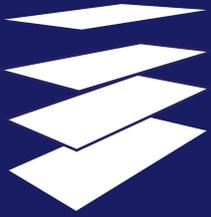

- Match up to your existing Pallet Rack Systems
- Designed and engineered to ensure that load capacities and performance standards exceed the given load ratings, with higher than required safety margins
- We repair, replace, make modifications and additions to all types and brands of Pallet Racking
- Few limitations to the types of goods that can be stored
- Simple to install and easily adjusted or relocated

Colby Drive In Pallet Racking

- High density storage for fast moving SKU's
- A great solution when selectivity is not a necessity; works on the Last In, First Out (LIFO) principle
- Designed for storing large quantities of the same product
- Lane depth is limited only by practicality
- Efficiently concentrates storage
- Maximises warehouse space by eliminating picking aisles, thus creating more storage within the same available floor space
- Perfect for cool room and freezer storage

Carton Live Storage (CLS)

- A gravity-fed order picking system designed to increase efficiency and productivity by consolidating storage
- First In, First Out (FIFO) automatic stock rotation
- Offers both full and split carton picking
- Easily adjusted or reconfigured for various different product types and sizes
- Can be free standing or integrated as part of a racking system or mezzanine floor
- Separate picking and restocking aisles
- Reduced labour and running costs

Pallet Live Storage (PLS)

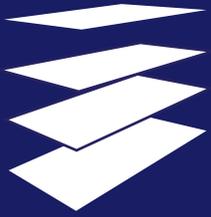

- First in, First Out (FIFO) automatic stock rotation
- Ideal for food and perishable items with expiry dates/shelf life
- Provides faster handling and simplified pallet selection
- Fewer aisles + multiple pallets deep = high density storage
- Safe and secure handling is ensured as pallets are fed and retrieved on opposite sides
- Great for chilled or freezer environments

Push Back Pallet Racking

- High density storage with front loading and unloading
- Configurations from 2 to 6 pallets deep
- Ideal for bulk storage, order consolidation and despatch areas
- Provides similar storage density to Drive In Pallet Racking, but with greater selectivity and access
- As pallets are removed the pallet behind automatically slides to the front position, ensuring the pick face is constantly full
- Last in, first out (LIFO) approach

LOGIX® Cantilever Racking

- Economical, flexible, adaptable and uniquely designed
- Light, medium or heavy duty systems
- Ideal for long, irregular and mixed loads
- Galvanised finish available for outside applications
- Single or double sided systems in short or long runs, to suit your needs
- Designed to your individual storage requirements, to accommodate different loads, heights and products
- Accessories are available to complete the system

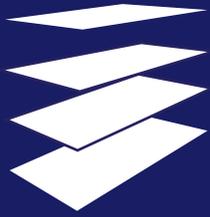

Fischer Plastic Storage

- Practical, portable, strong, durable and versatile
- Resistant to solvents and oils - hard wearing and long-lasting
- Made from a hospital grade material, which is both chemical and bacterial free
- Keep smaller items, accessories, tools and supplies organised and readily on hand
- (1) Spare Parts Trays come with removable dividers to suit storage needs
- (2) Stor-Pak Bins are stackable and wall mountable with larger sizes to suit bulkier items

Safety & Protection

1. LOGIX® Safe T Guard
2. LOGIX® End Rack Protector
3. LOGIX® Swing Over Pallet Safety Gate
4. Mesh Safety Barriers
5. Colby Corner Protectors
6. Colby Floor Channels & Guards

Raised Storage Areas

- Individually designed and engineered to suit your specific application
- Maximise the wasted air space above, doubling your current storage space
- Single or multi-tiered floor configurations
- (1) Rack or (2) Structural type
- Easily expanded, reduced or relocated as your requirements change; so it will always be optimised for your business
- Shelving can be easily added above or below the floor
- Easily integrated with stairs, handrails, conveyors or swing over pallet safety gates for a complete storage solution

Stairs

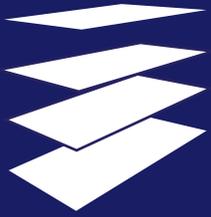

- Individually designed and engineered to suit your specific application
- Long-lasting, durable, safe and sleek steel stairs
- We manufacture many styles of steel stairs including: mezzanine floor, fire and service area access and more
- Single or multiple landing configurations
- Galvanised finish for durability outside
- Directional changes to reduce footprint
- Clever design to fit around protrusions
- Strong, safe, quality stair solutions

Conveyors

- Gravity, Powered, Accumulation, Pallet - whatever your needs we can design a conveyor solution
- Quickly and efficiently move anything, large or small, from point to point
- Quality systems, providing reliable service
- Versatile, flexible, safe, robust and simple
- Turn materials handling into cost effective materials flow
- Perfect for receiving and despatch, transportation of goods, order fulfilment and mezzanines (incline or decline and integrated picking modules)

LOGIX Safe T Glide®

- The next generation in Hand Operated Mobile Storage Systems
- Saves up to 60% floor space vs static shelving
- Ergonomically designed, high density system that maximises any storage space
- Requires minimal push force to initiate smooth movement of the mobiles - glides effortlessly
- Streamlined design allows for easy integration into any office environment
- Easily reconfigured or relocated to keep up with changing business needs

LOGIX Safe T Drive®

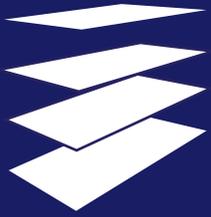

- The next generation in Mechanically Assisted Mobile Storage Systems
- Saves up to 60% floor space vs static shelving
- High capacity, versatile system with unparalleled speed and ease of access
- Provides maximum storage capacity in a minimum amount of space
- Our unique patented drive system ensures effortless movement of the shelving mobiles
- Highly configurable and provides enhanced mobility, maximising valuable floor space and consolidating storage

LOGIX® Longspan Mobile Storage System

- A flexible, reliable, high density and versatile storage system for archive boxes, storage bins and large, heavy, bulky or unusually shaped items
- An all-purpose storage solution able to be used for a variety of applications and products, offering easy display and access to stored items
- Choice of steel, mesh, particleboard or melamine shelves, that are fully adjustable in 50mm increments

LOGIX® Longspan Shelving

- So versatile, it can solve almost any storage problem
- High quality shelving that's low on price
- Strong, sturdy and durable
- Shelves are fully adjustable every 50mm, for ease of customisation
- Easily adjusted, reconfigured or relocated
- Fully modular system
- Maximum storage density, easy access and saves on wasted floor space
- Accessories are available to suit a multitude of storage requirements

LOGIX® RUT Shelving

- A space efficient, economical, versatile and multipurpose storage system
- Easily extended, reconfigured or relocated due to the systems modular design
- Height adjustable shelves in 25mm increments
- Available as a single or double sided shelving configuration
- Applications are limitless due to our range of accessories
- Achieve a high density solution by adding extra shelves or Fischer boxes
- A must when it comes to organisation

LOGIX® Gondola Shelving

- Retail design, industrial strength
- Available as single or double sided systems
- Punched or Louvre panel backs, for many merchandising options
- 'Feature Ends' for creative displays and additional storage
- Top caps and kick plates for that special finish
- Comprehensive range of accessories available to suit almost any product
- Adaptable, to keep up with changing business needs and product lines

Custom Designs

- Been told it can't be done, it won't work? Call us, we specialise in difficult, unusual, non-standard, custom and unique storage solutions to suit any application
- Our customised service includes the design, creation and installation of unique and efficient solutions for your specific storage requirements
- We provide quality, innovative and cost effective customised storage solutions to suit your storage problem
- The possibilities are endless with our in-house manufacturing capabilities
